About UMA

About UMA

UMA stands for universal market access, derived from our mission to make financial markets universally accessible and fair. UMA can be leveraged to create unstoppable financial contracts on the blockchain that can securely reference on-chain or fiat-world assets.

Brand Attributes

Our brand attributes describe how UMA should feel as a brand.

These attributes are used to check the tone of feeling of UMA's brand materials, writing, and website.

Innovative

Logo Wordmark

Primary Wordmark

A horizontal wordmark is the primary mark for UMA. It should be used in almost all instances that require brand representation and identification.

Usage Examples:

- UMA website
- Social media, avatars, headers
- Advertising, promotional material
- Collateral

Alternate Wordmark

The UMA wordmark can also be used on a dark gray background knocked out in white, with the center element of the “A” colored in the brand’s primary red color.

Tagline Lockup

The wordmark can also be used in conjunction with “Universal Market Access” for presentation purposes or further brand representation.

When using this lockup, “Universal Market Access” should always be stacked vertically underneath and equal to the width of the wordmark. “Universal Market Access” should be set in Halyard Display SemiBold.

Project Lockup

For additional brand representation along with the tagline lockup, the UMA wordmark may also be used with the word “Project”.

When using this lockup, “Project” should always sit beside the UMA wordmark on one line and be equal to the height of the wordmark. “Project” should be set in Halyard Display SemiBold.

Clearspace

The full wordmark should be allowed ample space from other elements including edges, images, and other logos. Leave space equivalent to the “U” from the wordmark.

Mark Size Limits

The full wordmark should never be reduced below 35px in width for screen applications, and 0.5” for print applications.

03

Brand Elements

Primary Typography

UMA uses Halyard as its primary typeface.

For all display and heading type,
Halyard Display SemiBold should be used.

For all body type, Halyard Text Book
should be used.

Primary Color

UMA's colors are simple yet bold. The dominant color of the brand is a vibrant red, signifying UMA's aspirational mission and distinguishing the brand from others in a similar space.

This color can be used as a highlight or accent, or can stand alone.

Secondary Colors

The secondary colors are a neutral palette to contrast against the primary red and add visual depth when needed.

These colors can be used within supporting elements such as backgrounds.
